State	Finished
Completed on	Saturday, 4 May 2024, 5:41 PM
Time taken	6 mins 1 sec
Marks	10.00/10.00
Grade	100.00 out of 100.00
Feedback	Congratulations!!! You have passed by securing more than 70%

Question 1

Correct

Mark 1.00 out of 1.00

What is the purpose of Azure Resource Locks?

Select one:

- ☐ To enhance network security in Azure
- ☒ To prevent accidental deletion or modification of Azure resources ✓
- ☐ To manage Azure subscription billing
- ☐ To physically secure Azure data centers

The correct answer is: To prevent accidental deletion or modification of Azure resources

Question 2

Correct

Mark 1.00 out of 1.00

How does Azure Automation contribute to resource management in Azure?

Select one:

- ☐ It manages Azure subscription billing
- ☒ It automates manual, time-consuming, and repetitive tasks in Azure ✓
- ☐ It physically automates tasks in Azure data centers
- ☐ It provides insights into the performance of Azure resources

The correct answer is: It automates manual, time-consuming, and repetitive tasks in Azure

Question 3

Correct

Mark 1.00 out of 1.00

How does Azure Monitor contribute to resource management?

Select one:

- ☐ It physically monitors Azure data centers
- ☐ It manages Azure subscription costs
- ☒ It provides insights into the performance and health of Azure resources ✓
- ☐ It assists in Azure resource deployment

The correct answer is: It provides insights into the performance and health of Azure resources

Question 4

Correct

Mark 1.00 out of 1.00

What role does Azure Cost Management and Billing play in Azure resource management?

Select one:

- ☐ It physically manages Azure data centers
- ☐ It enforces compliance with organizational standards
- ☐ It creates virtual networks in Azure
- ☒ It monitors Azure subscription costs and provides insights ✓

The correct answer is: It monitors Azure subscription costs and provides insights

Question 5

Correct

Mark 1.00 out of 1.00

What is the purpose of Azure Traffic Manager?

Select one:

- ☐ To manage Azure subscription costs
- ☐ To physically manage network traffic in Azure data centers
- ☒ To distribute traffic across global Azure data centers for improved availability ✓
- ☐ To monitor resource usage in Azure

The correct answer is: To distribute traffic across global Azure data centers for improved availability

Question 6

Correct

Mark 1.00 out of 1.00

What is the purpose of Azure Virtual Network Peering?

Select one:

- ☐ To manage Azure subscription billing
- ☐ To monitor resource usage in Azure
- ☐ To physically connect Azure data centers
- ☒ To enable communication between Azure virtual networks ✓

The correct answer is: To enable communication between Azure virtual networks

Question 7

Correct

Mark 1.00 out of 1.00

In the context of Azure, what does the term "ExpressRoute" refer to?

Select one:

- ☐ A customer support channel in Azure
- ☒ A high-speed, private connection to Azure from on-premises networks ✓
- ☐ A billing plan for Azure services
- ☐ A rapid deployment feature for Azure resources

The correct answer is: A high-speed, private connection to Azure from on-premises networks

Question 8

Correct

Mark 1.00 out of 1.00

In Azure, what role is responsible for defining fine-grained access permissions to resources?

Select one:

- ☒ Azure RBAC (Role-Based Access Control) ✓
- ☐ Azure Policy
- ☐ Azure Active Directory
- ☐ Azure Administrator

The correct answer is: Azure RBAC (Role-Based Access Control)

Question 9

Correct

Mark 1.00 out of 1.00

How does Azure Policy contribute to resource governance?

Select one:

- ☒ It enforces compliance with organizational standards and requirements ✓
- ☐ It provides customer support for Azure users
- ☐ It manages Azure subscription costs
- ☐ It monitors resource performance

The correct answer is: It enforces compliance with organizational standards and requirements

Question 10

Correct

Mark 1.00 out of 1.00

What is the primary purpose of Azure Blueprints?

Select one:

- ☐ Monitoring resource usage in Azure
- ☐ Designing virtual networks in Azure
- ☒ Creating standardized, repeatable sets of resources for an environment ✓
- ☐ Managing Azure subscription billing

The correct answer is: Creating standardized, repeatable sets of resources for an environment
